

BRANSON'S AND BEN'S GROCERY

COSC 304: Introduction to Databases

Developed by: Branson and Ben (Team 20)

Date: December 3, 2025

GitHub Repository: [cosc-304-2025/development-project-lab-7-10-team20](https://github.com/cosc-304-2025/development-project-lab-7-10-team20)

User ID's and Password

- Username: **arnold**, Password: **304Arnold! Admin Account**
- Username: **bobby**, Password: **304Bobby!**
- Username: **candace**, Password: **304Candace!**

ATTENTION!

If you attempt to run this code. You might need to change the jdbc.jsp connection database (change urlForLoadData to the commented out one). You must run loaddata.jsp FIRST, and then run LoadCursedData.jsp for the site to function properly, thanks!

EXECUTIVE SUMMARY

Branson's and Ben's Grocery is an online grocery platform designed to give customers a fast, convenient, and reliable way to shop for everyday essentials. Our store provides a seamless digital experience where users can browse products, manage their accounts, and place secure orders—all from the comfort of their homes.

Our primary audience includes busy individuals, families, and modern consumers who value efficiency, transparency, and real-time access to product information. Customers can enjoy detailed product descriptions, live stock availability, customer reviews, and personalized account features that make shopping intuitive and stress-free.

What sets us apart is our powerful and comprehensive system. The platform offers real-time inventory validation, order status tracking, advanced search and filtering tools, and a fully featured administrative dashboard. Administrators can easily manage products, monitor stock levels, review sales analytics, and moderate customer feedback.

The application is built using JSP, backed by a SQL Server database, and deployed through Apache Tomcat in a containerized Docker environment ensuring flexibility, reliability, and smooth deployment to cloud services.

We want to create a loyal community who is tired of shopping with traditional sights and want to explore the sweeter and darker things in life.

SYSTEM FEATURES: Core Customer Features

1. Product Browsing and Search

Main product catalog displays all available items with images, prices, and stock levels
Multi-criteria search: filter by product name, category, and price range
Sorting options: name (A-Z, Z-A) and price (low to high, high to low)
Real-time stock availability indicators with color-coding (green for in-stock, yellow for limited, orange for low, red for out-of-stock)
Product rating display with star ratings and review counts

2. Product Detail Pages

Comprehensive product information including ID, category, price, and description
Large product image display with fallback support for multiple image formats
Average customer rating with stars and review count
Stock availability status with detailed unit counts
Disabled "Add to Cart" button for out-of-stock items

3. Shopping Cart Management

Add products to cart with automatic quantity tracking
View cart contents with product details and running total
Update item quantities with real-time validation
Remove items from cart
Stock validation prevents adding out-of-stock or insufficient inventory
Error messages for invalid cart operations

4. Customer Account Management

Create new customer account with data validation
Login/logout functionality with session management
View customer profile information (name, email, phone, address)
Edit profile page to update personal information
Change password functionality with current password verification
Password confirmation and minimum length validation

5. Order Management

Secure checkout process with shipping information
Order history page showing all previous orders with date filtering
Order details include product list, quantities, prices, and totals
Order status tracking (Pending, Processing, Shipped, Delivered, Cancelled)
Color-coded status badges for visual clarity

6. Product Reviews

View customer reviews on product detail pages
Average rating calculation and display
Star rating visualization (★★★★☆)

7. Admin Dashboard

Centralized navigation to all administrative functions

Daily sales chart with visual graph (Chart.js integration)

Sales report table by date

Quick access to customer management, products, orders, inventory, analytics, and reviews

8. Customer Management

List all customers with search functionality

View customer details including contact information and order history

9. Product Management

Add new products with name, description, price, category, and image

Edit existing product information

Delete products from catalog

Upload product images (supports multiple formats: .jpg, .webp, .avif, .png, .gif)

10. Inventory Management

View inventory levels across all warehouses

Inline editing of stock quantities

Update inventory with real-time validation

Low stock alerts dashboard with three severity levels:

Out of Stock (0 units) - Red alert

Critical (≤ 10 units) - Orange alert

Warning (11-20 units) - Yellow alert

Statistics cards showing counts for each alert level

Quick links to manage inventory and products

11. Order Management

View all orders with comprehensive filtering:

Date range filtering (start and end date)

Order amount filtering (min and max)

Update order status from admin interface

Five status levels: Pending, Processing, Shipped, Delivered, Cancelled

Process shipments with automatic inventory deduction

Generate tracking numbers (format: BBG-orderID-shipmentID-timestamp)

12. Sales Analytics Dashboard

Key performance statistics:

Total orders count

Total revenue

Average order value

Total customer count

Daily sales report for last 30 days with date and total

Input validation on forms

WALKTHROUGH WITH SCREENSHOTS

As A USER

1. Landing Page

When a user first enters the page they're met with our home page, which displays our most sold items, they can begin shopping and browse all products, they can view their cart or log in.

2. Create an account

Branson's and Ben's Grocery [Shop](#) [Cart](#) [Login](#)

Create Your Account

Join the Cursed & Blessed Emporium and start shopping!

Account Information

Username *

Password *

Confirm Password *

Personal Information

First Name *

Last Name *

Email *

Phone Number (Format: 123-456-7890)

Address

Street Address *

City *

State/Province (2 letters, e.g., BC, AB) *

Postal Code (Format: A1A 1A1) *

Country *

[Create Account](#) [Back to Login](#)

Next for our create account page, basic information will be asked for an account. Here we check if a username or email are already in use, as well as checking if the email is in the correct format. If they do try to use a username already in use an error message will appear telling them to choose another. Email will also show an error that email is already in use. As well checks if the passwords match

3. Login and session
